

Unleashing ChatGPT Chat with your own Data using Python, Langchain, Streamlit

Amr Elsehemy

About the Speaker

Amr Elsehemy

- Independent Consultant focused on AI
- Co-Founder of an AI startup
- Active Consultant @ GLG
- Ex-Director of Tech @Scrips (CTO)
- Ex-Director of AI and DX @ITWorx
- Ex- TA and RA @CIS ASU
- MBA - Hult International School of Business
- MSc. – CIS ASU

Expertise

Working with clients from
Gulf to North America

- **Industries**
- Enterprise
- Healthcare / Pharma
- Education
- Government

Agenda

- What is LLM and LLM applications
- ChatGPT .. The Api
- Langchain quick overview
- Introduction to Streamlit
- Building a conversational Chatbot over your own Data

LLMs and LLM applications

- Large Language Models (LLM)

- LLMs APIs (e.g. OpenAI)

- Embeddings
- Completion
- ChatCompletion

- Applications using LLMs

Demo

- OpenAI Models
 - Embedding
 - Completion
 - Chat
- 

Langchain

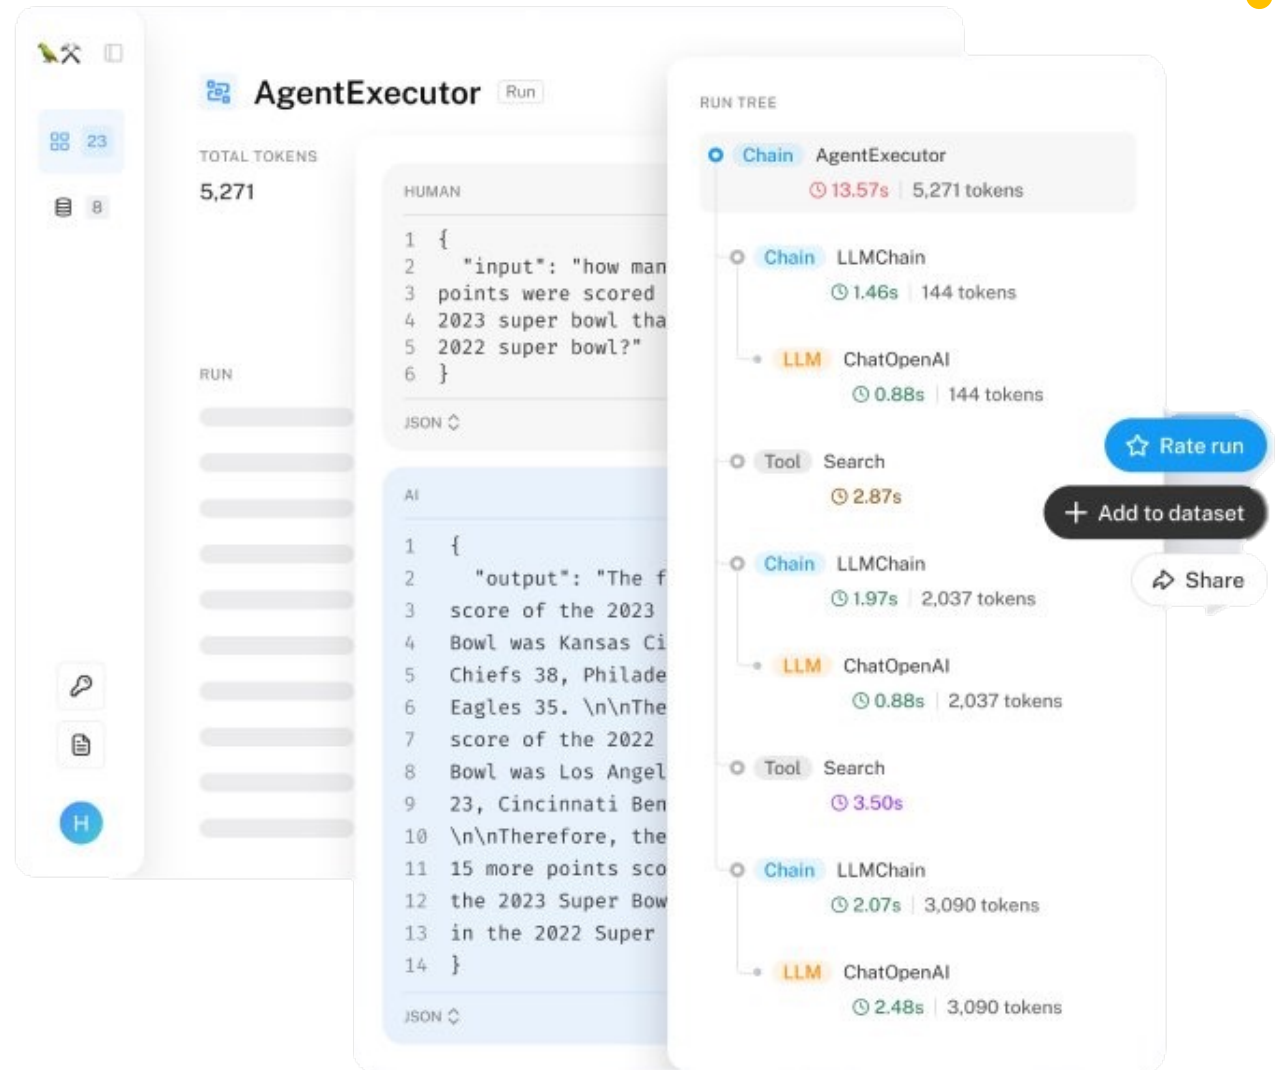

- Building applications with LLMs through composability
- Open-source framework for building LLM apps
 - Started in October 2022, More than 52k stars
 - 235 versions as of today
 - Python and Javascript
 - Inc. and raised \$10M March 2023
- What can Langchain help with
 - LLMs and Prompts
 - Chains
 - Data Augmented Generation
 - Agents
 - Memory
 - Evaluation

Langchain – Ecosystem

- Langchain.com
- [Integration Hub](#)
- Langsmith (A unified platform to help developers debug, test, evaluate, and monitor their LLM applications.)

Demo

- Langchain abstraction LLMs
- Loaders
- Retreiver
- QA
- Chat

Streamlit

- Open-source python library, builds web-apps for ML and Datascience
- Philosophy
 - Embrace Python scripting
 - Treat widgets as variables
 - Always rerun from top to bottom
- Ecosystem
 - Streamlit Cloud
 - Streamlit Share
 - Streamlit open-source lib

Demo

- Streamlit in action
- 

Creating a Chatbot using ChatGPT, Python, Langchain, and Streamlit

Putting all together

Demo

- Building your chatbot
